

Minerals codify traditional mining in Jebel Amer

The

Minister of Minerals and the Governor of North Darfur visited Jebel Amer and announced the commencement of the legalization of traditional mining in Jebel

Ministry of Minerals

The Minister of Minerals d. Ahmed Mohammed Mohammed Al-Sadiq Al-Karouri They came to Jabal Amer in order to regulate and regulate traditional mining in order to maximize the benefits and minimize the negatives in this sector, calling on the traditional miners to cooperate fully with the committees that will work in rationing in full agreement.

Addressing crowds of traditional minerals in Jebel Amer on Monday during a visit to LolBrigadier Abdul Rahim Hamdan Daglo, MPs from the Security and Defense Committees, the Energy and Mining Committee of the National Council, the Director of the General Authority for Geological Research and a number of leaders of the armed forces, security and police revealed the establishment of a fund to support services in the Jabal Amer area. The kick-off will begin in the near future in cooperation with the mining companies operating in the region, which is one of the terms of their contracts to provide CSR services in the communities where they are located and ZAD (any company that refrains from providing CSR We will cancel the ratification The contracts concluded with them revealing at the same time the cancellation of contracts (30) companies last year for non-compliance with controls, including the provision of social responsibility and increased by saying (we are ready to cancel the contract of any company does not comply with the controls). There are large reserves of all metals. For his part, the Governor of North Darfur State Abdel Wahed Youssef said that the issue of security and stability and imposing the prestige of the state in Jebel Amer will continue the state categorically at the same time is not true what is going on in the media about the presence of foreigners in Jebel Amer There are no negative exaggerated phenomena in Jebel Amer, but they are natural phenomena in society.He pointed out that there are some practices but the state is able to address them through security agencies and civil administrations.

The governor said that the traditional mining operations that will take place in Jabal Amer will not be affected by any minerals. `` We in this mine do not have a distinction between people and it is known that mining areas bring people from all over Sudan and any Sudanese citizen who can make a living in Jabal Amer, " he said.

For his part, the Commissioner of Al-Sarif locality, where Jabal Amer is located, said that there are more than (5) thousand minerals working in the mountain in full agreement without differences, pointing out that there are some demands that the miners want the state to meet them as a hospital or health center in the mountain to Besides providing water services.

It is worth mentioning that the visit included inspection of Al-Junaïd factory for traditional mining residues located in Jabal Amer, which is expected to enter the production stage by the end of next March.
